5. MANUFACTURING.

Table No. 33.

SUMMARY OF FACTORY STATISTICS—QUEENSLAND.

(NOTE :—In this table heat, light, and power factories (Class xvi) are included).

Definition of Factory.—A factory for statistical purposes is an industrial establishment in which four or more hands are employed or in which power other than hand or horse is used.

Average Number of Persons Employed.—This information has been compiled in two ways—(*a*) Average number of hands over the whole year ; (*b*) Average number over the period of operation.

Value of Output.—This represents the selling price at the factory of all products manufactured during the year, whether sold or held in stock.

Value of Production.—This figure is arrived at by deducting from the value of output the cost of raw materials, containers, fuel, light, power, oil, water, tools replaced and repairs to buildings and plant. It has been agreed upon by the Australian Statisticians as being the best estimate at present obtainable of the contribution of factories to national wealth production. It represents the fund which provides wages and salaries, profits, interest, and rent. Its most serious fault is that it includes the cost of depreciation which strictly should have been deducted along with other " costs of production."

b Figures on lines marked thus refer to "Average Number of Hands, &c., over the period during which the factory was in operation."

c Book values, less any depreciation reserve in respect of them, as stated by factory proprietors.

d Comparisons between years should be made with care on account of changed definitions. From 1936-37, horsepower is defined as "rated horsepower of engines ordinarily in use."

e Excluding electric motors (41,403 h.p. in 1937–38) used in factories where the electricity was generated by themselves. The prime movers only are included.

f The amount of Depreciation on Buildings, Machinery and Plant as stated on returns was £1,190,231 for 1937-38.

b Payable Overseas £3,202,282, Australia £1,953,588.

NOTE.—During the year ended 30th June, 1921, the addition to the Public Debt amounted to £10,592,088. The actual increase in the Loan Liability of the State was £4,625,172. The sum of £10,592,088 included £5,936,916, portion of the funds of the Queensland Government Savings Bank. It was the practice to make use of these funds towards meeting the cash requirements of the State. As no securities were issued for the sum used in this manner, the liability was not treated as part of the Public Debt. In terms of the Agreement under which the Queensland Government Savings Bank was transferred to the Commonwealth Bank in the year 1920, Queensland Government Securities for this sum had to be issued to the latter Bank, thus necessitating the addition of the amount to the Public Debt.
